## **Abbreviations :**

### BT = Broader term

Broader term is the superordinate term in a hierarchical relation. It is equivalent to Major Class. It can not be subordinated to any other term.

### NT = Narrower term

Narrower term is the subordinate term in a hierarchical relation. It is equivalent to 1st, 2nd, 3rd level. It allows to improve granularity. Narrower terms can be cascaded. In this case, 3rd level term is subordinated to 2nd, which is subordinated to 1st.

### UF = Used For

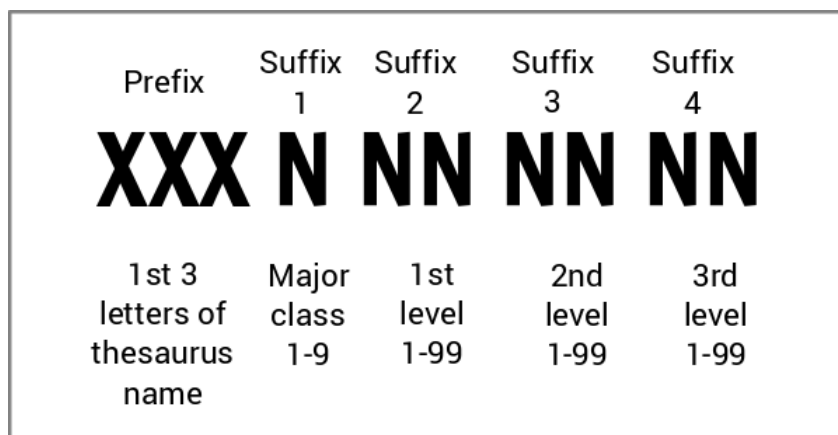

Indicates that the following term or terms are not used in indexing and that heading term is used instead.

### USE = Use

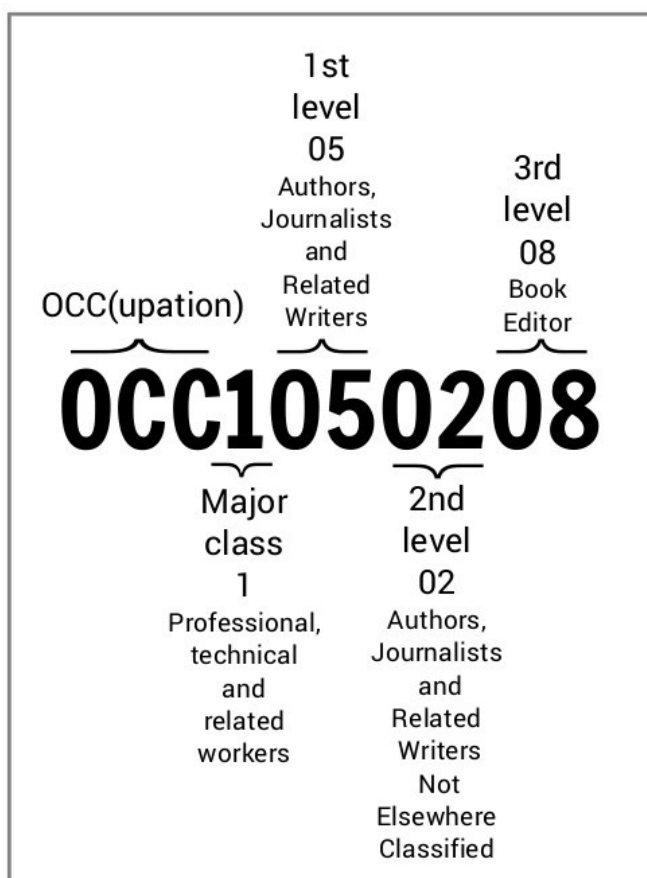

Indicates that the heading term is not used in indexing and that the following term or terms are used instead.

## Codes and identifiers.

Each term (except UF/USE) contained in a thesaurus has a unique alphanumeric identifier reflecting the hierarchical structure of the thesaurus. It is built that way :

Please note that only prefix and suffix 1 are required. Suffixes 2, 3 and 4 are optional. They are used only if the level of granularity needed to define a term requires it. The following example shows how the identifier for the occupation 'Book editor' is built.

# INTENSITY (INT)

# LIST OF TERMS

## Browsing (INT1)

A type of reading behaviour, when we are flipping/scrolling/clicking through a book or books, looking for something specific/of interest and can imply, or rather generally implies, skipping whole pages or even chapters without reading them

## Deep reading (INT2)

UF: Immersed

Thorough, attentive and detailed reading, which requires an effort for really understanding what's being read and allows for thinking one's own thoughts; or, according to M. Wolff and Barzillai: "the array of sophisticated processes that propel comprehension and that include inferential and deductive reasoning, analogical skills, critical analysis, reflection, and insight" (2009)

## Emphasized (INT3)

UF: Rereading

An act of returning to the text (after having read it already some time ago). The distinction, mentioned in the parenthesis, is important, because going back to reread e.g. a quote you have just read for the first time in order to better understand its meaning is clearly characteristic of deep reading, while returning to the text you've consumed sometime in the past is a whole different matter.

## Normal reading (INT4)

Means reading the text through and following every word, but on the other hand doesn't necessarily reach the level of deep, immersed reading.

## Pen in hand (INT5)

UF: Marginalia

UF: Underlining

## Skimming (INT6)

UF: Scanning

Reading on a surface, i.e. superficial glancing through text, that is in fact very similar to scanning, but is generally still more intensive than browsing, because it presupposes actually looking at every single page

## Other (INT7)

Place here other types of reading intensity that are not listed in the current thesaurus.
